

GitHub
github.com

The home for all developers — including you.

Welcome to your personal dashboard, where you can find an introduction to how GitHub works, tools to help you build software, and help merging your first lines of code.

Start writing code

Start a new repository

Collaborate on code with others and track your work in a repository.

[Create a new repository](#)

Create your profile README

Create a file in a repository that tells the GitHub community who you are.

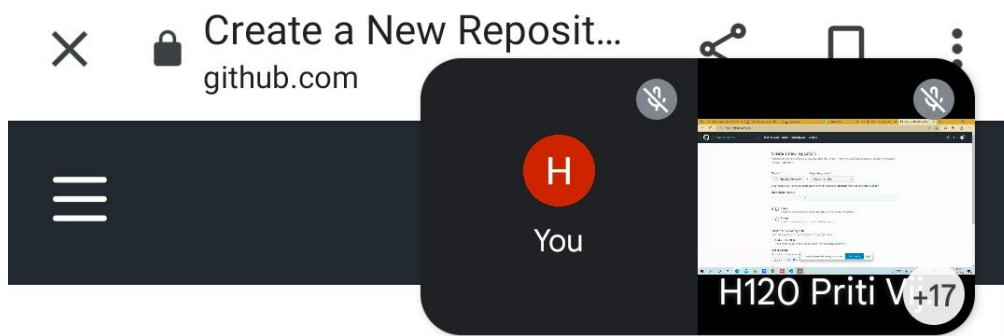

[Create a README](#)

Contribute to an existing repository

[Find repos that need your help >](#)

Use tools of the trade

Create a new repository

A repository contains all project files, including the revision history. Already have a project repository elsewhere? [Import a repository](#).

Repository name *

Python_Internship ✓

Great repository names are short and memorable. Need inspiration? How about [redesigned-eureka?](#)

Description (optional)

Public

Anyone on the internet can see this repository. You choose who can commit.

Private

You choose who can see and commit to this repository.

Initialize this repository with:

Skip this step if you're importing an existing repository.

☐ Add a README file

Public

Anyone on the internet can see this repository. You choose who can commit.

Private

You choose who can see and commit to this repository.

Initialize this repository with:

Skip this step if you're importing an existing repository.

Add a README file

This is where you can write a long description for your project.

[Learn more.](#)

Add .gitignore

Choose which files not to track from a list of templates. [Learn more.](#)

.gitignore template: None ▼

Choose a license

A license tells others what they can and can't do with your code.

[Learn more.](#)

License: None ▼

This will set  **main** as the default branch. Change the default name in your [settings](#).

You are creating a private repository in your personal account.
